

CLAIMS

Claims 1 - 3 (canceled)

Claim 4. (Previously presented) The combination as claimed in claim 20 2, wherein there are four spaced bracket holders fixed to said platform.

Claim 5. (original) The combination as claimed in claim 4, wherein each of said brackets have a horizontally disposed section and a vertically disposed section,

said bracket holders being mounted to said horizontally disposed section of said bracket, and

each of said bracket holders being fixed to said bottom of said platform.

Claim 6. (original) The combination as claimed in claim 5, wherein said vertically disposed section of each bracket has a sleeve movable along said vertically disposed section, and

a clamp mounted by a pivotal connection to said movable sleeve, said exercising device having a frame member on which said clamp is mounted, and

said means for adjusting said brackets relative to said exercising device in two different directions is said sleeve and said clamp.

SERIAL No. 10/033,788

Claim 7. (original) The combination as claimed in claim 6, wherein there are four bracket holders,

each of said bracket holders being spaced from other bracket holders,

each bracket holder receiving a horizontally disposed section of said bracket, and

means on each bracket holder for engaging said horizontally disposed section of the bracket.

Claim 8. (original) The combination as claimed in claim 7, wherein said means on each bracket holder for engaging said horizontally disposed section of the bracket is screw threaded.

Claim 9 (canceled)

Claim 10. (Previously presented) The device as claimed in claim 21 ~~9~~, wherein said support is attached to said exercise equipment by means of supporting rods and brackets, and

wherein thumbscrews are used with said supporting rods and brackets to adjust the position of said rods with respect to said brackets.

Claim 11. (Previously presented) The device as claimed in claim 21 ~~9~~, wherein said support is manufactured with said exercise equipment.

Claim 12. (Previously presented) The device as claimed in claim 20 ~~1~~; wherein said exercising device is a treadmill.

SERIAL No. 10/033,788

Claim 13 (canceled)

Claim 14. (Previously presented) The combination as claimed in claim 22
13, wherein said platform has a bottom,

said brackets being attached to said bottom of said platform by
bracket holders.

Claim 15. (original) The combination as claimed in claim 14, wherein
there are four spaced bracket holders fixed to said platform.

Claim 16. (original) The combination as claimed in claim 14, wherein
each of said brackets have a horizontally disposed section and a
vertically disposed section,

said bracket holders being mounted to said horizontally disposed
section of said bracket, and

each of said bracket holders being fixed to said bottom of said
platform.

Claim 17. (original) The combination as claimed in claim 16, wherein
said vertically disposed section of each bracket has a sleeve movable
along said vertically disposed section, and

a clamp mounted by a pivotal connection to said movable sleeve,
said exercising device having a frame member on which said clamp
is mounted, and

said means for adjusting said brackets relative to said exercising
device in two different directions is said sleeve and said clamp.

SERIAL No. 10/033,788

Claim 18. (original) The combination as claimed in claim 16, wherein there are four bracket holders,

each of said bracket holders being spaced from other bracket holders,

each bracket holder receiving a horizontally disposed section of said bracket, and

means on each bracket holder for engaging said horizontally disposed section of the bracket.

Claim 19. (original) The combination as claimed in claim 18, wherein said means on each bracket holder for engaging said horizontally disposed section of the bracket is screw threaded.

Claim 20. (Previously presented) The combination of an accessory for an exercising device and an exercising device comprising:

an exercising device,

an accessory,

means for mounting the accessory to said exercising device,

said accessory having a computer device with a keyboard for inputting instructions to the computer device,

said computer device being connected to the Internet,

said means for mounting the accessory having a platform,

said platform having a bottom,

brackets attached to said exercising device,

said brackets being attached to said bottom of said platform by bracket holders,

said brackets also being attached to said platform, and

SERIAL No. 10/033,788

means for adjusting said brackets relative to the exercising device in two different directions.

Claim 21. (Previously presented A device for use with exercise equipment comprising:

- a support mounted on exercising equipment,
- a personal computer,
- a keyboard on said support to input instructions to said personal computer,
- said personal computer being connected to the Internet,
- whereby a user can simultaneously operate the personal computer and access the Internet while exercising.

Claim 22 (Previously presented The combination of an accessory for an exercising device and an exercising device comprising:

- an exercising device,
- an accessory having means for mounting a game device on said exercising device,
- said game device having a computer device,
- said means for mounting the game device comprising a platform,
- brackets attached to said exercising device,
- said brackets also being attached to said platform,
- a computer keyboard connected to the computer device and connected to the Internet,
- said computer keyboard being used for inputting instructions to the computer to operate said game device , and
